Software Developer with a B.S. in Computer Information Systems and experience building responsive web and mobile applications using JavaScript, React, React Native, and Vue.js. Skilled in REST API integration, reusable UI development, debugging, and cross-functional collaboration. Detail-oriented and committed to building maintainable, user-focused software.

EXPERIENCE

BNL Consulting, Remote

Mid-Level React UI Developer | 2025-Present

- Develop and maintain responsive, production-scale web applications using React, JavaScript, and component-based UI architecture for CDC public health platforms.
- Integrate React applications with REST APIs and backend services across Node.js/Express and SAS systems to support reliable, data-driven functionality.
- Build reusable UI components, enhance existing application features, and troubleshoot frontend-to-backend issues to improve maintainability and user experience.
- Document and validate REST API integrations using OpenAPI/Swagger and Postman, collaborating with backend developers to define request and response structures.

Sight Production LLC, Chicago, IL

Software Developer | 2022-2025

- Develop responsive single-page applications (SPAs) using React, JavaScript (ES6+), ensuring cross-browser compatibility and optimized performance.
 - Integrate frontend applications with REST APIs and backend services, handling asynchronous data and dynamic UI updates.
-
